**Section 97222**

*Effective with discharges on or after January 1, 1997, in order to describe the patient's source of admission, it is necessary to address three aspects of the source: first, the site from which the patient originated; second, the licensure of the site from which the patient originated; and, third, the route by which the patient was admitted. One alternative shall be selected from the list following each of three aspects:*
